

Qmatec offers engaged engineers and business consultants. Our engineers contribute to the creation of value within the field of oil and offshore industry in the south of Norway. Several of our customers are leading players in their business. Either our engineers are an integrated part of our customer's staff, or they carry out assignments from our offices in Grimstad, and they guarantee that services are delivered at a highly professional level. Qmatec appreciate the importance of recruiting engineers who will contribute both professionally and socially to our customers.

Electro/ Automation Engineer

We are looking for Electro / Automation Engineer

As a result of increased activity, both at our office in Grimstad and at our customers, we want to strengthen our team with an experienced Electro / Automation Engineer.

Key Responsibilities

- Development of system design, specifications and preparation of documentation and drawings, preparation of datasheets, and supplier follow-up of electro packages
- Take part in design reviews, Hazop sessions and milestone revisions.
- Ensure information flow with other disciplines.

Position Requirements

- A Bachelor's degree or a Master's degree or equivalent with a minimum of 2 years experience.
- Knowledge and experience from offshore / marine / subsea technology is an advantage, but graduates are also encouraged to apply.
- Strong interpersonal skills; Team-oriented and inspiring with a positive, hands-on attitude.
- Fluent in written and spoken English.

Our engineers operate out of our own office in Grimstad as well as from our customer's locations. The assignments come from a range of companies in the oil and offshore industry, many of whom are world leading in their specific area. This provides our engineers with a changing and stimulating everyday work situation.

Qmatec can offer competitive compensation, pension and insurance plan and various welfare arrangements. Send Your CV by e-mail. References will be required, and possible interviews can be done by skype.
