

Qmatec offers engaged engineers and business consultants. Our engineers contribute to the creation of value within the field of oil and offshore industry in the south of Norway. Several of our customers are leading players in their business. Either our engineers are an integrated part of our customer's staff, or they carry out assignments from our offices in Grimstad, and they guarantee that services are delivered at a highly professional level. Qmatec appreciate the importance of recruiting engineers who will contribute both professionally and socially to our customers.

Industrial Designer / Design Engineer

We are seeking a talented Industrial Designer.

As a result of increased activity, both at our office in Grimstad and at our customers, we want to strengthen our team with an experienced Industrial Designer.

Key Responsibilities

- Concept and design development through all phases of the design process.
- Product design and engineering, 3D modelling, preparation of production drawings, project and end user documentation.
- Fabrication and assembly follow up, verifications and test follow-up

Position Requirements

- A Bachelor's degree or a Master's degree in industrial design or equivalent with a minimum of 2 years experience.
- Knowledge of offshore / marine / subsea technology, and experience in product development from offshore industry and marine structures.
- Strong creative, conceptual, and analytical skills.
- High skill level in 3-D (Inventor, Pro-E, Solid Works) and production drawings.

- Strong understanding of 2-D graphic software (Photoshop and Illustrator) and office computer software applications.
- Strong interpersonal skills; Team-oriented and inspiring with a positive, hands-on attitude.
- Fluent in written and spoken English

Qmatec can offer competitive compensation, pension and insurance plan and various welfare arrangements. Send Your CV by e-mail. References will be required, and possible interviews can be done by skype.
